hidden

🕒 Created	@Jan 16, 2021 10:11 AM
🏷 tags	steganography steghide

We are given a png file

```
> file flag_embed.png
flag_embed.png: JPEG image data, JFIF standard 1.01, aspect ratio, density 1x1, segment length 16, baseline, precision 8, 1200x900, components 3
```

Opening the png file doesn't reveal anything.

as the challenge is of steganography then its pretty sure the data is hidden in the file. There are various tools which can be used to embed data in png files one of them is `steghide` which can embed files inside image files. we can try to extract the file hidden in this png using steghide.

```
> steghide extract -sf flag_embed.png
Enter passphrase:
wrote extracted data to "flag.txt".
> cat flag.txt
ctf{h!ding_d4ta_!n5!d3_f!l3s}
```

using an empty password we were able to extract the flag file and get the flag.
